about the book

Deploying a novel mix of scientific evaluation and personal observation, Kolodko begins with a discussion of misinformation and its perpetuation in economics and politics. He criticizes the simplification of complex economic and social issues, and investigates the link between developments in the global economy and cultural change, scientific discoveries, and political fluctuations. Underscoring the necessity of conceptual and theoretical innovation in understanding our global economic situation, Kolodko offers a provocative study of globalization and the possibility of coming out ahead in an era of worldwide interdependence.

*"Truth, Errors, and Lies distills lessons for development learned from a whole life of work and observations by a thinker and practitioner of economic transition and real-world politics." —Justin Yifu Lin, chief economist and senior vice president of the World Bank*
